## **FOREST CITY REPLACES RESIDENTIAL WATER METERS**

Forest City, Iowa - The City of Forest City is replacing all residential water meters within the next 6 months. This will provide a more cost effective means of reading water meters throughout the City.

The Forest City Water Department or Adam Torkelson of Torkelson Plumbing & Heating will be contacting home owners by phone or put a note on the door to call to set up an appointment to put the water meter in. If residents are home when they come to the door, then they will install the new water meter at that time. The water meter replacement should take between 30 and 60 minutes.

If you have any questions, contact City Hall at 641-585-3574.
